

ventless
 smokeless
 no chimney
 no permissions
 burn bioethanol
 no hard connections

Fanola® is a bioethanol based fuel for use in biofireplaces. It is of plant origin and is safe for environment as well as for humans. It burns completely and clean, meaning that while burning it produces only: heat, water vapour and CO² in amounts comparable to that of human breath.

Fanola® - fuel for biofireplaces
 no smoke or smell
 no harmful substances emitted
 of plant origin
 safety attested by the German LGA
 and North American EcoLogo.
